

Role and activities of the ENRD Contact Point to support the collection and transferability of relevant experience

Transfer processes of good practices: a comparison
of experiences and results

Rome, 4^h March 2010

ENRD Objectives

To establish an ENRD Project Information
& Knowledge Sharing Exchange
(PIKSE)

Purpose of PIKSE

(Project Information and Knowledge Sharing Exchange)

Why collect and transfer relevant experience?

The PIKSE will provide relevant project information, knowledge and experience to all stakeholders within the ENRD to:

- Enhance RDP **implementation** at National & European level
- Raise **awareness** of the use of EAFRD/EAGGF funds
- Promote **transfer** & use of relevant RD practices & ideas
- Build/complement systems provided at Member State level

General steps planned

- 1) Research existing NRN 'Good Practice' systems and methods
- 2) Develop Pilot NRN PIKSE Guidance framework
- 3) Establish NRN Pilot PIKSE Coordination Team
- 4) Design pilot system (database) – operational
- 5) Collect and collate at least 50 relevant example case studies
- 6) Pilot dissemination of results/case studies to relevant stakeholders
- 7) Plan and agree on expansion of system and specific actions with all relevant ENRD stakeholders

NRN Pilot PIKSE

Where are we now?

Specific purpose:

- ▶ Test the approach and methodology for the collection and presentation of relevant experience
- ▶ Identify a common shared framework for presenting relevant experience (structure /content of case studies)
- ▶ Identify gaps /difficulties in collection of relevant experience
- ▶ Inform the next phases of the PIKSE / Other RE system(s)

How was the pilot PIKSE born?

- ▶ Based on review of NRN current systems
- ▶ Based on research & review of other systems
- ▶ Based on previously identified priorities & concerns of NRNs
- ▶ Building on past experience not replicating it
- ▶ Driven by the growing need to make something happen at EU level

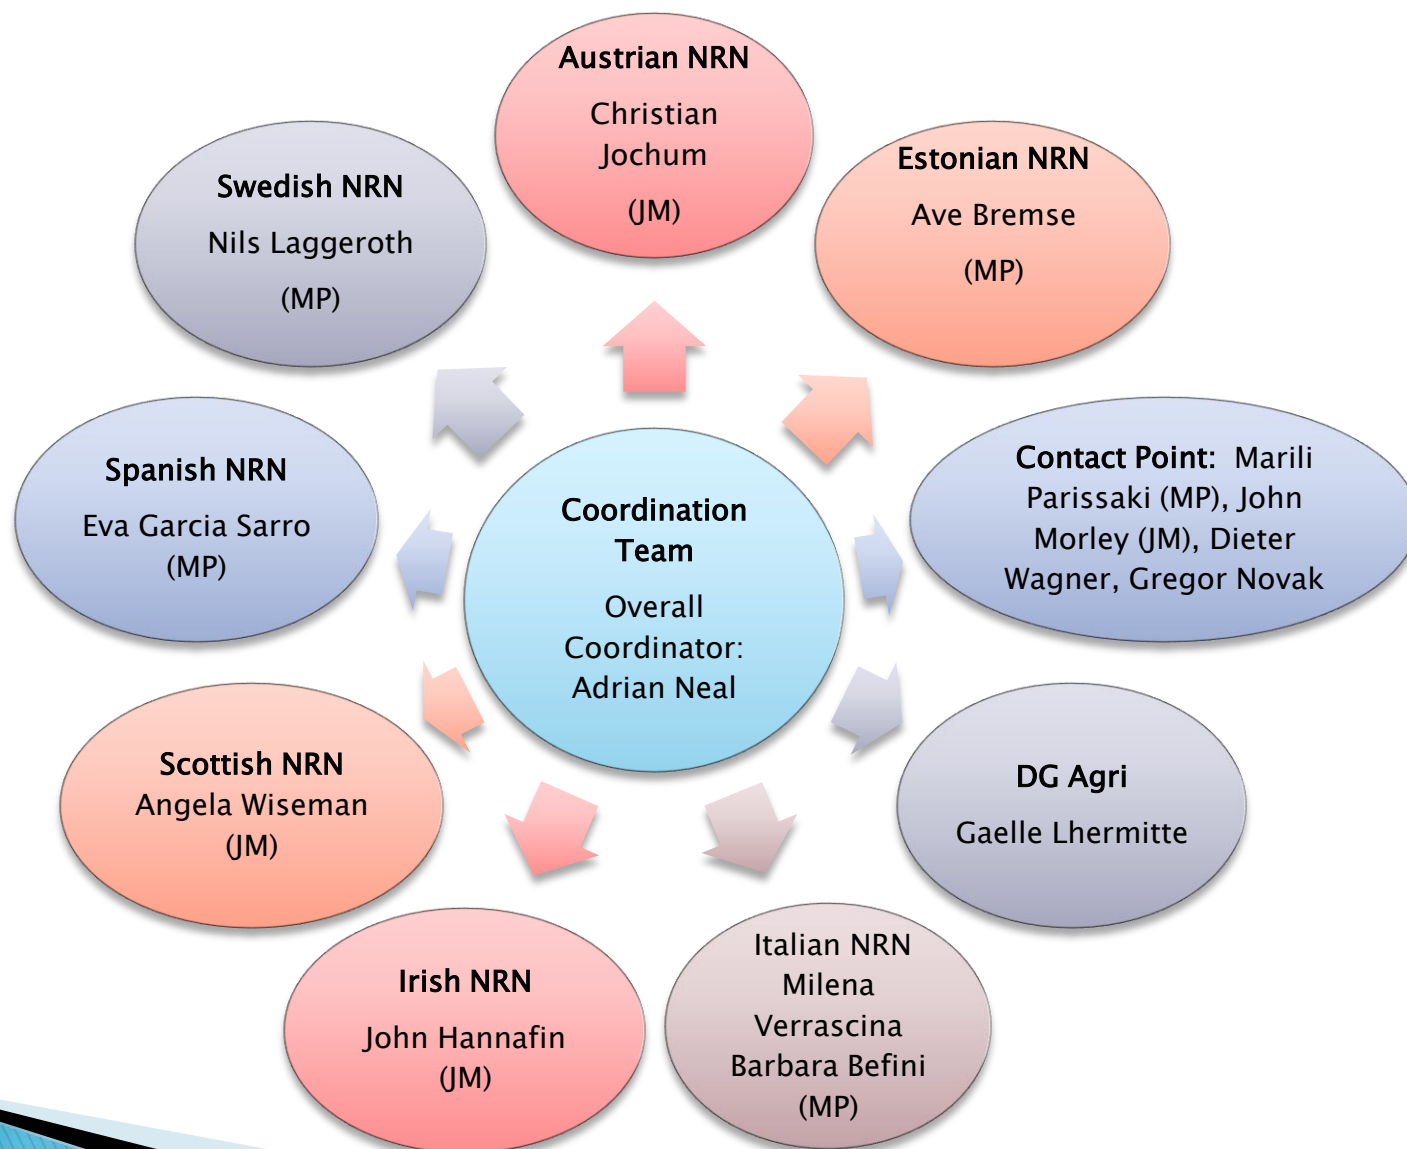

Proposed Thematic Areas of the Pilot

- ▶ **Renewable energy**
(measures 121–126, 311, 321, Leader)
- ▶ **Investment in agro–processing & agricultural holdings**
(measures 121, 123, 125, 126, Leader)

The PIKSE Pilot Coordination Team

Pilot PIKSE Methodology

How are we working?

Collection:

- ▶ The NRN Pilot PIKSE Coordination Team will be responsible for the collection of initial case study materials using an agreed template(s)
- ▶ Collection is proposed in two phases:
 - 1st phase of 20 case studies to be completed by end February
 - 2nd phase of 30 case studies to be completed by early May

Collation:

- ▶ A Pilot database system will be designed and made operational, initially based on MS ACCESS by March
- ▶ The design will be developed to ensure compatibility and future utility linked to the ENRD website

Outline of possible content of relevant experience examples

- ▶ Background information (incl. finance and initiators)
- ▶ Nature and scale of the project
- ▶ Results (on-going or final)
- ▶ Relevance of the case study for others including:
 - problems and their solution
 - transferability and mainstreaming potential
 - innovation
 - sustainability
 - institutional, social and environmental aspects
- ▶ Lessons learnt / to share with others

Dissemination of pilot results

What next?

- ▶ *Events:* At least 2 pilot presentations linked to other MS events:
 - Possible for 8th NRN: Meeting in March (update on progress with Pilot)
 - Possible 9th NRN: Meeting in June (presentation of pilot outcomes & planned next steps for BIG PIKSE)
- ▶ *Publications/other communications:*
 - On-line case study information will be posted on the ENRD website – what format / level of detail?
 - Newsletter articles featuring case study examples
 - Two theme based publications (case studies); and
 - One summary publication for the general public
 - All linked to a pilot communications strategy – to be elaborated

Some food for thought...

- Instil a culture within the ENRD of collecting /sharing relevant experience... (both +ve and -ve)
- "How could my project experience be useful for others?"
- Project design to incorporate tools for sharing /transferring experience...
