• <b>MOXIDECTINE</b>	• CYDECTIN INJ + CYDECTIN POUR ON + CYDECTIN 10% LA	• Nematodes + ectoparasites	• +/- 1 month
• <b>OXFENDAZOLE</b>	• FENDOV 750 + FENDOV 1250	• Nematodes + flat worms	• +/- 4-5 months
• <b>MOXIDECTINE + TRICLABENDAZOLE</b>	• CYDECTIN TRICLAMOX	• Nematodes + liverfluke + some of ectoparasites	• +/- 1 month
• <b>DICLAZURIL</b>	• VECOXAN	• Coccidia	• /
• <b>TOLTRAZURIL</b>	• BAYCOX + CEVAZURIL	• Coccidia	• /
• <b>FENBENDAZOLE</b>	• PANACUR BOLUS (VEAU) + 10%	• Nematodes	• 3-4 days
• <b>LEVAMISOLE</b>	• LEVAMISOLE + QUADROSOL 10% + QUADROSOL POUR ON	• Nematodes	• 3-4 days
• <b>ALBENDAZOLE</b>	• VALBAZEN 10% (DOSEX2 : DOUVE)	• Nematodes + flat worms + liverfluke	• 3-4 days
• <b>OXYCLOZANIDE</b>	• ZANIL	• Flat worms + liverfluke	• /
• <b>NITROXINIL</b>	• DOVENIX	• Liverfluke	• /

# Natagriwal asbl

- Specific approach for anti-parasite treatments for animals grazing on pastures that come under an AECM extensive farming contract (« meadows of high biological interest »)
- 
- In-house veterinarian specialised in parasitology

## Guidance for farmers

- Global and preventive approach:
  - « Diagnosis » and analysis of the level of parasites on the host animals
  - Pasture management
  - Low risk eco-toxic treatments
- Interaction between the breeder, the in-house vet and the treating vet
- Roughly 100 farms currently being followed
