

Good Practice Workshop

DRAFT AGENDA

‘Assessing generational renewal in CAP Strategic Plans’

14 – 15 March 2024
Zagreb, Croatia

European Evaluation Helpdesk for the CAP

Generational renewal is a key priority under the current CAP implementing period, as almost a third of farm managers across the EU were 65 years of age or older in 2020. The decline in farm succession is often associated with land abandonment, decreasing farm efficiency and capital losses. Thus, the need for attracting and supporting young and new farmers is critical. This is not only a matter of renewing agricultural labour force but also of boosting the innovation and modernisation of the sector.

Building on previous evaluations and the evolving framework under the new CAP architecture, this Workshop aims to provide a comprehensive overview of the methods and approaches used in assessing generational renewal. Special attention will be paid to the role and participation of women in farming, integrating the gender equality dimension into an evaluation perspective for the Member States.

Aims of the workshop

The Good Practice Workshop will gather and share practices on generational renewal. The Workshops' specific objectives are to:

- **Increase the evaluation knowledge of stakeholders** involved in the evaluation of generational renewal in the context of CAP Strategic Plans.
- **Exchange practical experiences** from past evaluations on generational renewal, at regional or national level, including where possible the gender equality perspective.
- **Provide an opportunity for networking and identifying needs for further support** for Managing Authorities, CAP networks and evaluators in relation to the evaluation framework for assessing generational renewal, including its gender equality dimension.

Target audience

The Workshop will be an opportunity for Managing Authorities, CAP networks, Paying Agencies, evaluators, EU-level evaluation experts, and other evaluation stakeholders in the Member States to exchange with each other. Generational renewal and gender equality experts will also participate to the Workshop to provide specialised input on evaluation elements and approaches useful for assessing this topic. The working language will be English.

Outcomes

A final report and speaker presentations from the Workshop will be published on the EU CAP Network website, when available.
