European Commission

Common context indicators for 2014-2020 RDPs

Evaluation Expert Committee
30th April 2103

Zélie Peppiette
DG Agriculture and Rural Development

Agriculture
and Rural
Development

What has happened since March 20th? (1)

- Adjustments following discussion of open questions

- Checking certain data sources with external providers (e.g. JRC, DG ENV)

- Further refinement of some definitions/units

- Extraction of all available data

- Formatting/processing of data to match context indicator definitions

What has happened since March 20th? (2)

- Calculation of some estimates and proxies

- Adapting of structured template to match revised database

- Revision of list and definitions document

- Linkage of summary database and structured template

- Preparation of a working document on proxy indicators

The current package: Revised list

- Revised table of data sources and availability
- Changes marked in yellow
- Fuller notes on calculations, data availability and constraints (e.g. comparison of standard of living of farmers to rest of economy)
- Details of some estimations included (e.g. regional labour productivity in agriculture)
- Definitions fully harmonised with data sources (e.g. farm managers)

The current package: data availability summary

- Summary info for each indicator

- Traffic light system

- Easy reference for RDP MAs

The current package: summary database

- Appropriate level for RDP territories

- Data transformed as required to match definition

- Formatted to correspond exactly to structured template

- Limited to data for CCIs at RDP level

The current package: background databases

- Three separate files (socio-economic, sectorial, environmental)

- EU27, national figures and full regional breakdown

- Contains data for different years

- Where CCI is a composite or calculation, all components shown

The current package: The structured template

- Two documents: Excel file, and explanatory Word document

- Used to present the common context indicators in the RDP

- Revised to match summary data base

- Linked to it for easy data extraction

- "Open" file so MA can update where more recent data available locally

The current package: Working document on defining proxy indicators

- To be presented after the coffee break ☺

What next?

- Demonstration of linked database and structured template
- Uploading of linked files onto CIRCA
- Potentially some further updating of certain indicator data (EUROSTAT due to release 2012 employment data end-April; 2012 Natura data due May)
- Good practice workshop in Prague (27th/28th May)
- Inclusion of list of common context indicators in implementing act

- Development and use of proxies and programme-specific indicators at RDP level
- Preparation of territorial analysis, SWOT, needs assessment at RDP level (ONGOING!)

Thank you!
