

Evaluation of NRN(P)

*Feedback on 15th Meeting of NRN, Ahtari, Finland,
7 – 9 May 2012*

Purpose, organisers and participants

Working session on evaluation

Plenary presentation: Findings from the MTE of NRNPs and the case of MTE of Italian NRNP

Workshop : The role of Monitoring and Evaluation/self-assessment in improving the value of networking

Open space session:

- focus of evaluation of networks,
- intervention logic and indicators in evaluation of networks

Outcomes of the workshop

Key questions

How did activities of your network effect the fulfilment of RD objectives?

How have activities of your NRN been monitored and evaluated in the current programming period?

What did you learn from evaluation / assessment?

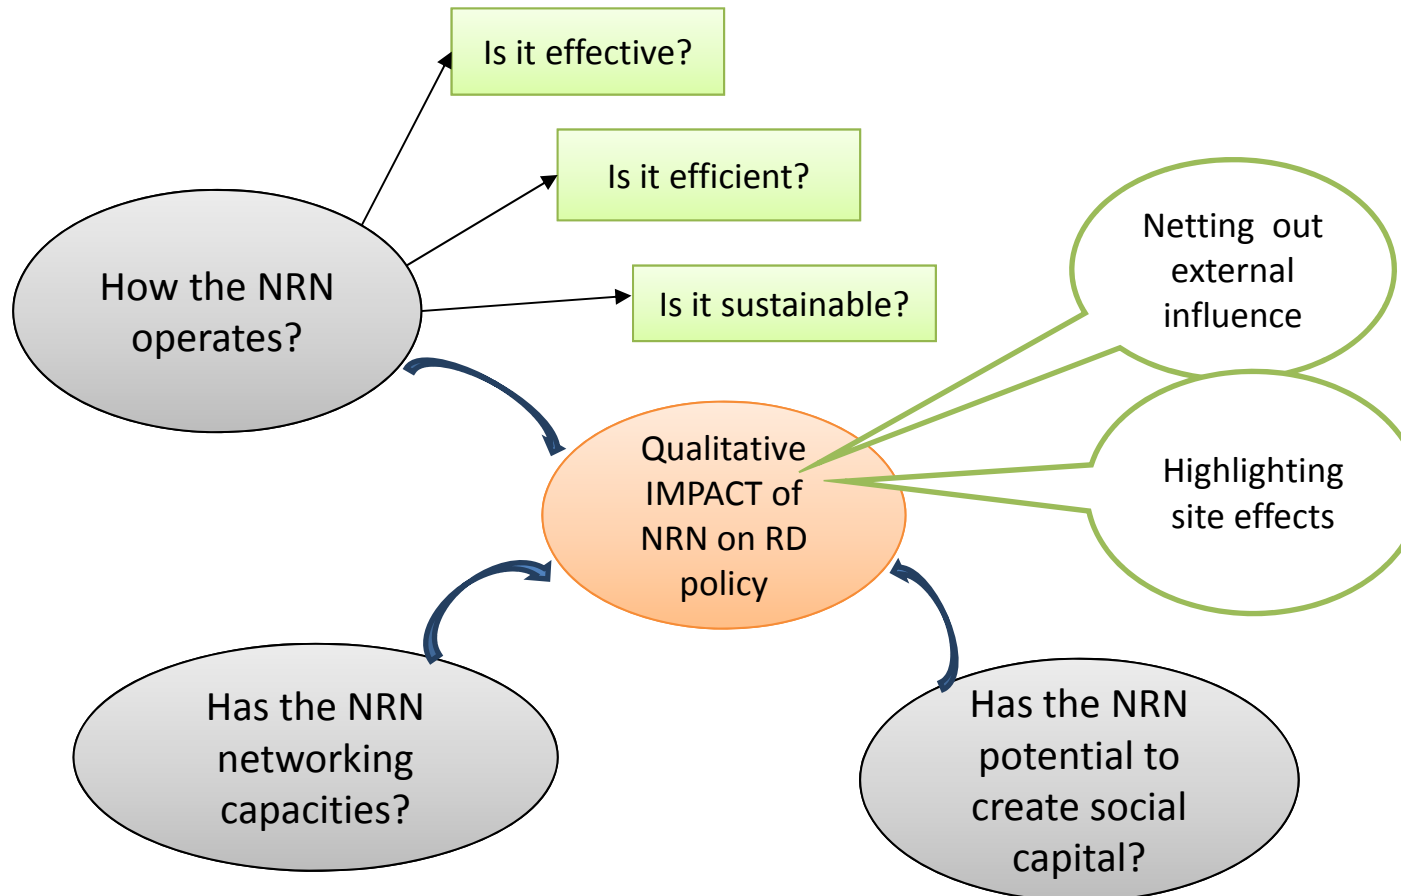

Outcomes

Objectives are rather horizontal, contribute most to Axis 3 and 4 and least to where most money goes (Axis 2)

Evaluation not connected to RDP objectives and stakeholders
Lack of resources, motivation, data
Monitoring provides overview without integration & interpretation

Design a better intervention logic
Adapt set of indicators and evaluation to NRN needs
Use feedback to improve action plan

Open space: Focus in evaluation of Networks

Up date of the NRNP working paper - content

European Evaluation Network
for Rural Development

1. About the Working paper
2. Networks and their assessment
3. Network Programme as the subject of the evaluation
4. Overview of guidance, methods and results in evaluation of Networks
5. Conclusions and recommendations
6. Case studies of ES, IT and FI
